

Chain Events

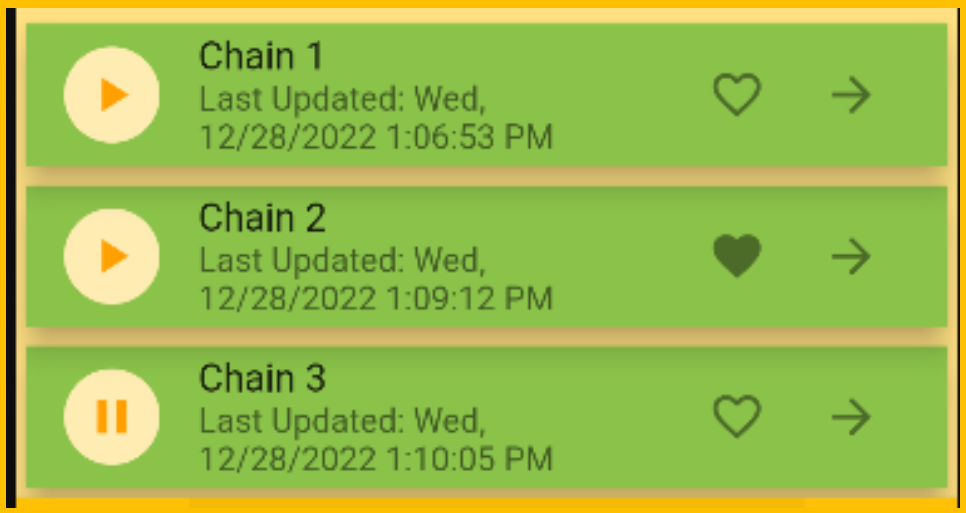

What is It & How It works?

1. Description of Screens

1.1. Home Screen

- Theme of this app is to keep all required controls at the bottom of the screen, which can help user to work single handedly on large screen phones.
- Home screen has a Bottom App Bar with:
  - **List of Chains** that contains the Chain of Events, as under:

  - **Search Bar** to filter Chains listed on Home screen, showed in later section.

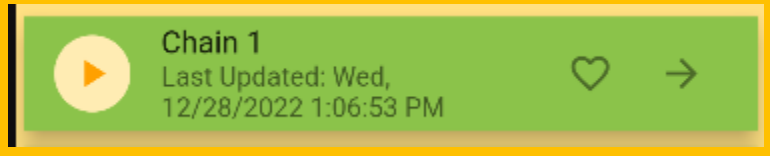

- **Add Chain Button** that will take us to “Add or Edit Chain Event Screen” showed in later section.

  This button looks as: 

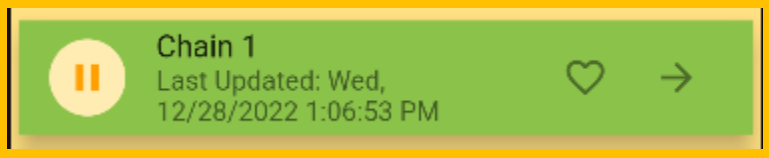

1.2.Tile of Individual “Chain” item on Home Screen

- Tile of Individual Chain Item from List of Chain on Home (Chains) Screen has controls to:
  -  Play the Chain (of Events in it).
  -  Mark the chain as Favorite.
  -  See the execution summary of Chains.

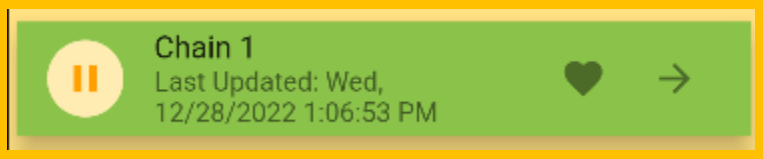

- Pressing the Body of Chain (i.e. Tile of Individual “Chain” item on Home Screen, itself) will navigate the App to “1.4. Add/Edit Chain Event Screen”.
- Pressing the → button will navigate the App to “1.6. Chain execution summary Screen”, and modify Chain of Events.
- Pressing the Play button will Execute the chain and take us to "1.8 Play Chain Screen"
- Newly Created chain or Completed will look on Home Screen (Chains) as under:

- Chain will execute on Pressing ▶ and Tile of this Running Chain will look as:

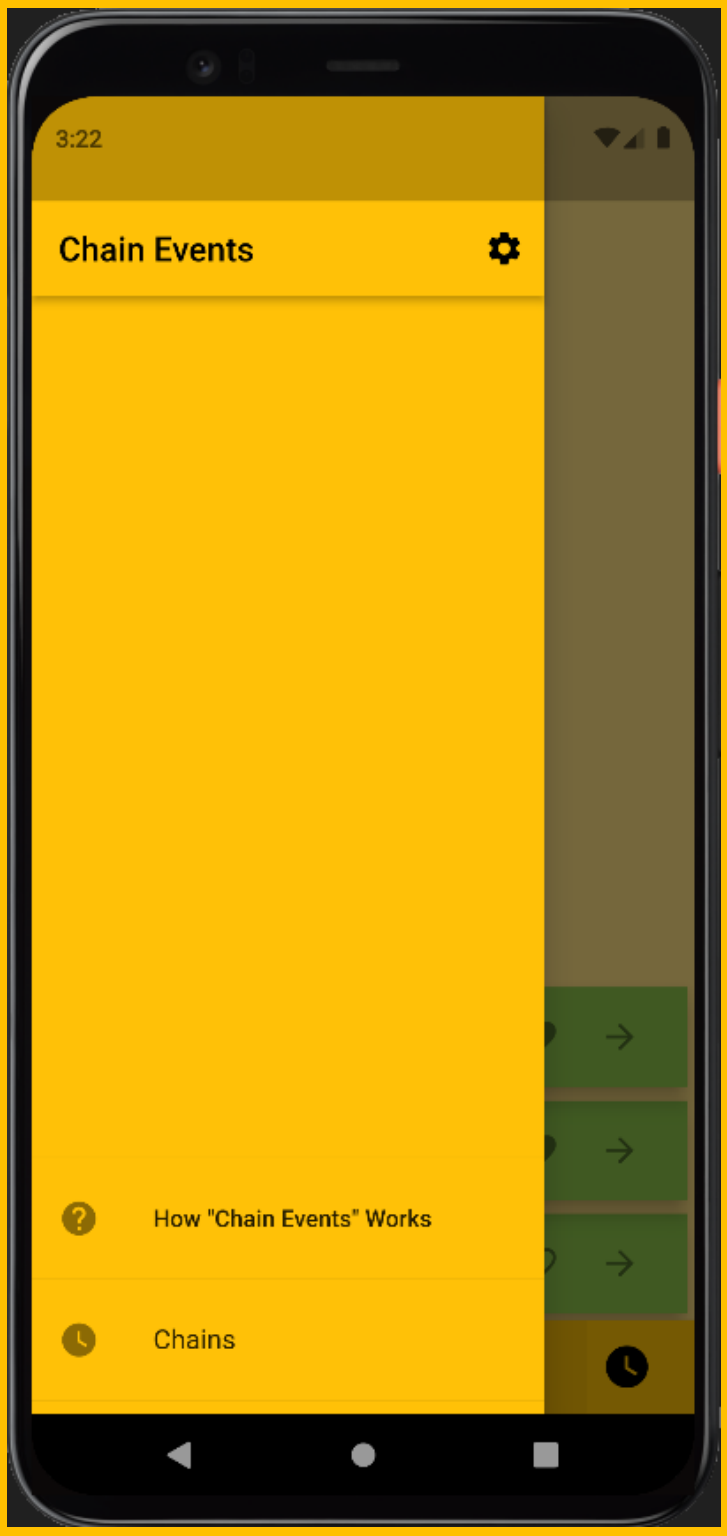

- Chain can be marked as favorite on pressing ♡ and tile of Chain will look as:

1.3.App Drawer

- Bottom App Bar on every Screen of this app has an App Drawer that looks like a Burger Icon as ≡ .

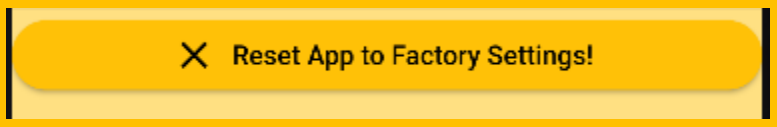

- App Drawer pops up on pressing this icon as:

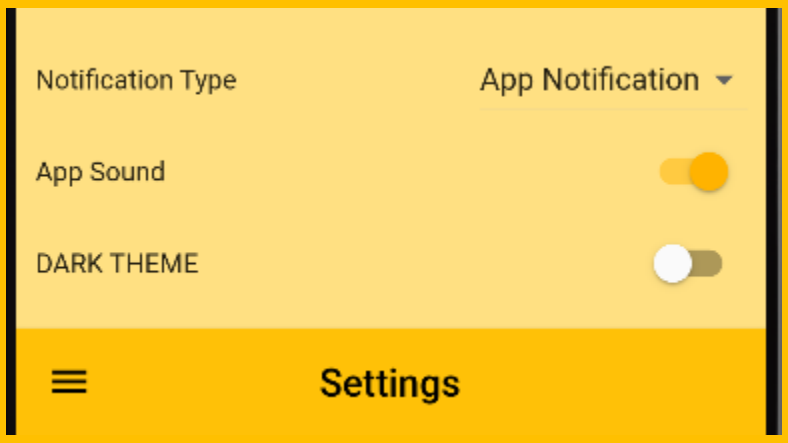

- App Drawer has three main Menu Items as under:
  - Chains, which is the Home Screen of this App.
  - How “Chain Events” Works, which opens this PDF file to help you with App usage.
  - Gear Icon ⚙ for App Settings.
- Summary of all these Menu items is available in their respective sections later.

1.4.Settings Screen

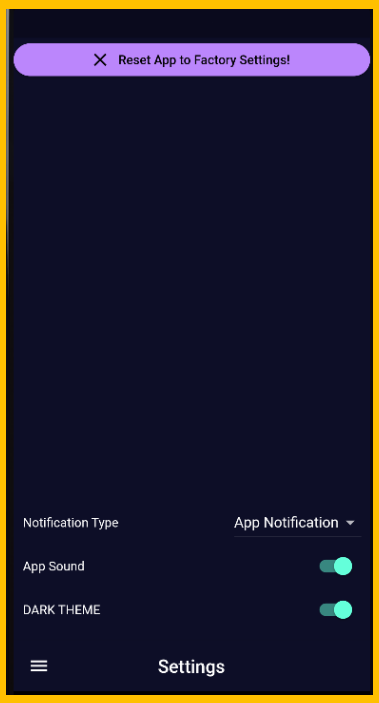

- Settings Screen allows you to control the following aspects of this App:
  - Restore App to Factory Settings:

  - App Configuration:

- Dark Theme:

- App Sound, This just turns on or off the sound on Completion of Event in any Chain.
- App Notifications: Sound of App Notification depends on Platform (Android, IOS) Settings.
